

Swagger link for backend: <https://2ced68f4450d.ngrok-free.app/swagger/index.html>

(Keeps changing) update this in C:\Farming\frontend\src\services\apiConfig.ts file for backend to get connected.

Now open the swagger link

Open

POST/api/Authentication/login

Give try it out

```
{  
  "email": "afra@example.com",  
  
  "password": "Afra123!"  
}
```

Use this and when you receive the token copy it and use it to authorize it.

Once this is done start the app

Cd project directory

npx react-native start

cd project directory

npx react-native run-android

login and use this for admin

email:afra@example.com

password:Afra123!

For customer
